

Valentine's Passion

With the sweet smell of roses wafting their way towards us, we have put together a simple creation for Valentine's Day.

This design picks one of the many stylish boxes from our florist supplies range and is filled with red roses and eucalyptus. To create the perfect accessory for the silk flowers we have added a big touch of Valentines with the subtle use of hearts on wire.

A recipe passionate enough to melt the hearts of a loved one!

Equipment Needed

Scissors	Wire cutters
Knife	22 swg Wires
Clear Pot Tape	Parafilm

Ingredients

- 1x Red Rose Valentines Box 15cm x15cm
- 1x12 Silk Red Rose Bud Bunch
- 1x Red Heart Bead Garland
- 1x Dry floral foam brick
- Selection of Silk Foliage

1. Place dry floral foam in the box, trim the foam so that it is slightly higher than the rim of the box.
2. Tape into the box tightly with the clear pot tape.
3. Take the foliage, cut it into smaller lengths and arrange it so that the foliage covers the top of the box, and hangs slightly over the edges.
4. Take the red roses, cut them down and then push them into the foam amongst the foliage to give an attractive, balanced arrangement
5. Cut the red heart garland into smaller pieces, attach with wire, and then push into the foam amongst the foliage and roses.
6. Finally if there are any gaps, or you can see any foam showing, fill them in with foliage.
